

Droughts and Downpours: Managing for Extremes

A Forum for Information Sharing, Collaboration and Solutions

October 30, 2018
Hypertherm

Hosted by the Upper Valley Adaptation Workgroup

Working Definition...

- **Climate Resiliency** is the ability of a community to anticipate, prepare for, respond to and recover from climate impacts in a way that minimizes significant disruption to our lives and compromise of shared resources. This includes our health, safety, built environments, food availability, natural resources, wildlife and financial strength (among others).

Droughts and Downpours:
